

FAZAL KARIM

Senior Frontend / Full-Stack Engineer · React · Next.js · TypeScript · Node.js · Realtime Systems
Lahore, PK | +92 324 496 2952 | fazalkarim.dev@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL HIGHLIGHTS

- 7+ years building and shipping production software across startups and Fortune 500 teams
- Full-stack ownership from architecture and system design through to deployment and production support
- Realtime systems experience — Firebase Realtime Database, PubNub, live synchronization, and notifications
- React / Next.js / TypeScript expertise with a strong frontend architecture and performance focus
- Cross-platform delivery across web and mobile (React Native, Ionic)
- AI-assisted development workflows using Cursor and Claude for faster prototyping and delivery

PROFESSIONAL SUMMARY

Full-stack engineer with 7+ years shipping production web and mobile systems across startups and Fortune 500 teams. I own products end-to-end — from an ambiguous problem to architecture, implementation, and deployment — primarily with React, Next.js, TypeScript, and Node.js. I have delivered multiple products solo from zero to production, make pragmatic engineering trade-offs to ship quickly without piling up debt, and think in systems rather than isolated components. I use AI-assisted workflows (Cursor, Claude) to accelerate prototyping, debugging, and documentation while keeping a strong product perspective.

TECH STACK

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Angular, React Native, Redux, Tailwind CSS, Material UI, HTML5, CSS3

Realtime & Backend: Node.js, Express.js, Ruby on Rails, Firebase (Realtime DB, Auth), PubNub, GraphQL, REST APIs, WebSocket-based sync

Architecture & Performance: Frontend architecture, system design, SSR, ISR, performance optimization, scalability

DevOps & Tools: Git, Docker, CI/CD, Vercel, Heroku, Bitbucket, Jira, Trello

Testing: Jest, Enzyme, Cypress, Manual QA

AI-Assisted Development: Cursor, Claude, AI-assisted code generation, AI-assisted debugging, rapid prototyping, documentation generation, workflow automation

PROFESSIONAL EXPERIENCE

Freelancer — Senior Software Engineer (Founding-style Engineer) Remote · Jan 2021 – Present

- Built and shipped multiple production web and mobile products from scratch as the sole engineer — owning architecture, implementation, deployment, and ongoing production support.
- Operated as the single technical owner across ambiguous, fast-moving client engagements: scoped loose requirements, made pragmatic architecture decisions, and delivered working software on tight timelines.
- Designed and delivered full-stack systems with React, Next.js, TypeScript, and Node.js — owning everything from frontend architecture and API design to release.
- Shipped realtime features (live synchronization and notifications) using Firebase Realtime Database, and iterated quickly on direct client feedback.
- Drove client communication directly, translating business goals into shipped features and fast iteration cycles.
- Embedded AI-assisted workflows (Cursor, Claude) into daily development to speed up prototyping, debugging, code generation, and documentation.

AnaNinja — Senior Software Engineer Remote · Jan 2024 – Aug 2024

- Led migration of the delivery portal from Vue.js to React Admin, modernizing the admin stack and improving maintainability.
- Built and shipped administrative systems supporting localization and inventory management workflows.
- Delivered features across React, Vue.js, React Admin, and TypeScript, and partnered with QA to harden the UI ahead of release.

Nisum — Senior Software Engineer Remote · Aug 2021 – May 2024

- Built enterprise-grade applications with React, Angular, Node.js, TypeScript, and GraphQL for Fortune 500 clients.

- Designed responsive, accessible (WCAG) interfaces that improved usability across browsers and devices.
- Owned code quality as a mentor and reviewer — leading code reviews and pair programming to keep the codebase clean and consistent.
- Rolled out CI/CD pipelines and integration testing (Jest) with globally distributed teams.

Devsinc — Associate → Software → Senior Software Engineer Lahore · Jan 2019 – Aug 2021

- Led cross-platform product development across Angular, React, React Native, Node.js, and Ruby on Rails.
- Shipped proofs-of-concept that evolved into production systems, strengthening the delivery pipeline.
- Integrated third-party services (Stripe, Google Places, Firebase) across multiple web and mobile products, and designed modular DRY/SOLID UI systems that reduced rework.

Codexia Technologies — Software Engineer Lahore · May 2018 – Jan 2019

- Built and shipped hybrid mobile apps with Ionic + Angular, delivering consistent UX across iOS and Android.
- Designed Firebase-backed features — authentication and realtime data — for products including Kodeec, QuitFix, and Cambuz.

Narsun Studios — Frontend Developer Lahore · Sep 2017 – Jan 2019

- Engineered realtime UI for large-scale live stadium interactions (Xcite Interactive) using Angular, Firebase, and PubNub.
- Delivered seamless live user engagement with realtime frontend-backend synchronization over Express.js.

Old Alpha Academy — Lecturer, Computer Science Lahore · Aug 2015 – Jan 2017

- Taught foundational computer science, sharpening the ability to explain complex systems clearly.

PROJECT HIGHLIGHTS

Roxova — Media content licensing platform — manage your own content and request licenses for third-party content, with automated legal handling and a pre-licensed content library.

Stack: Next.js, React, Node.js **Ownership:** Frontend architecture and feature delivery.

Prologis — Real estate management platform covering sale, rental, and lease operations plus logistics, measurements, and legal compliance.

Stack: React, Node.js, GraphQL (accessibility-first UI) **Ownership:** UI architecture and API integration.

Kodeec — Real estate listing app for Gulf markets — contact agents/owners, show interest, and post requests that trigger realtime notifications.

Stack: Ionic / Angular, Firebase Realtime Database **Ownership:** Built realtime notification and listing features.

Samurai — Retail management platform spanning inventory, warehouse, delivery, payments, returns, and wishlist.

Stack: Vue.js, React Admin, Google Maps, Material UI **Ownership:** Delivered admin and operational workflows.

Run Buddy — Pet fitness app — schedule sessions with trainers, track activity, manage pet profiles, and handle payments.

Stack: React Native, Ruby on Rails, location tracking, scheduling, chat, Stripe **Ownership:** Owned mobile feature delivery.

Go Boon — Referral and recruitment platform that matches candidate profiles against job postings scraped from multiple sources and posted directly by companies.

Stack: Angular, React, React Native, Ruby on Rails **Ownership:** Delivered cross-platform features.

EDUCATION

BS Software Engineering — University of the Punjab (PUCIT) · 2013 – 2018
