

Senior Full Stack Engineer – Angular, React, NodeJs, Ruby on Rails

 Lahore, PK |  +92 324 496 2952 |  fazalkarim.dev@gmail.com

 [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Engineer with **7+ years of experience** designing, developing, and scaling web/mobile applications across startups and Fortune 500 companies. Specialized in **Angular, React, NodeJs**. Proven ability to **lead engineering efforts**, collaborate with cross-functional teams, ship production-ready solutions with a focus on performance and accessibility.

TECH STACK

Frontend: Angular, React, Next.js, React Native, Redux, Tailwind, Material UI, TypeScript, JavaScript (ES6+), HTML5, CSS3

Backend: Ruby on Rails, Node.js, Express.js, Firebase, GraphQL, REST APIs

DevOps & Tools: Git, Docker, Bitbucket, Claude, Cursor ,CI/CD, Jira, Trello, Vercel, Heroku

Testing: Jest, Enzyme, Cypress, Manual QA

PROFESSIONAL EXPERIENCE

Freelancer – *Senior Software Engineer*

 Remote |  January 202 – Present

- Providing Full Stack services in cross platform responsive Web and Mobile App solutions.
- Worked as an engineer and a lead on multiple projects. Completed multiple projects from scratch as a solo dev.
- Experienced with End to End development, requirement gathering, AI driven development, scaling solutions.

AnaNinja – *Senior Software Engineer*

 Remote |  January 2024 – August 2024

- Developed solutions for admin panels, including localization and inventory management.
- Lead migration of Delivery portal from VueJs to React Admin.
- Apps were configured in **React, VueJs, React Admin** and **TypeScript**.
- Collaborated with QA to improve UI, debugging and fixing bugs.

Nisum – *Senior Software Engineer*

 Remote |  Aug 2021 – May 2024

- Developed enterprise-grade applications using **React, Angular, Node.js, TypeScript**, and **GraphQL**.
- Built responsive, cross-browser UI with accessibility (WCAG) standards, improving usability.
- Mentored junior devs and enforced clean code practices via regular **code reviews and pair programming**.
- Collaborated with global teams to roll out CI/CD pipelines and write integration tests using **Jest**.

Devsinc – Associate Engineer → Software Engineer → Senior Software Engineer

 Lahore |  Jan 2019 – Aug 2021

- Led development of cross-platform apps using **Angular, React Native, React, Ruby on Rails, and NodeJs**.
- Delivered complete POCs that evolved into production systems, improving the delivery pipeline.
- Integrated third-party APIs (Stripe, Google Places, Firebase) across multiple mobile and web projects.
- Built robust, modular UI systems following **DRY/SOLID** principles to reduce refactoring needs.
- Facilitated Agile workflows—sprint planning, retrospectives, backlog grooming, and QA coordination.

Codexia Technologies – Software Engineer

 Lahore |  May 2018 – Jan 2019

- Developed hybrid mobile apps using **Ionic + Angular 6**; ensured pixel-perfect UX across platforms.
- Built **Firebase**-integrated features (auth, real-time data) for apps like QuitFix, Kodeec, Cambuz.
- Participated in manual QA on Android/iOS, reducing production bugs.

Narsun Studios – Front End Developer

 Lahore |  Sep 2017 – Jan 2019

- Engineered UI for large-scale live stadium interactions (Xcite Interactive) using **Angular 4, Firebase, PubNub**.
- Ensured real-time user engagement with seamless frontend-backend sync using **Express.js**.

Old Alpha Academy – Lecturer in Computer Science

 Lahore |  Aug 2015 – Jan 2017

- Taught foundation computer science to high school students; honed communication and instructional skills.

 PROJECT HIGHLIGHTS

- **Roxova:** It was a media content licensing platform, where you can manage your own content and request a licence for someone else's. It managed all of the legal aspects and had a content library from which you can opt for any pre-licensed content. Built with Next.js + React + NodeJs.
- **Prologis Platform:** It was a real estate management system, complying to sale/renting/lease and every mode of land operations. The platform used to manage all of the logistics/measurements and some legal compliances as well. The project was configured using React + Node + GraphQL, accessibility-first UI.
- **Kodeec:** It was a real estate listing app for gulf countries. You can contact agents and owners, show interest in listing, put up your desired request which will result in notifications. It was a hybrid mobile application built on top of Ionic/ Angular + Firebase Realtime DB.
- **Samurai:** A retail management that managed all aspects of a purchase including inventory/warehouse/delivery/payments/returns/wishlist. It was built on top of Vue Js + React Admin + Google Maps + Material UI.
- **Run Buddy:** It's a Pet workout app, where you can schedule an activity with a trainer, track progress of an activity, manage profile of your pets, payment gateways and scheduling. It's a hybrid mobile app built with React Native + Ruby on Rails + Location tracking + Scheduling + Chat + Stripe.
- **Go Boon:** A Referral management system, which manages personal and corporate profiles. Candidate profiles are computed against shipped job postings. Jobs are scrapped from different platforms and self posted by companies. Built with Angular + React + React Native + Ruby on Rails.

 EDUCATION

BS Software Engineering

University of the Punjab (PUCIT) — 2013 – 2018
