FAZAL KARIM

Senior Full Stack Engineer — TypeScript · React · Next.js · Node.js

Lahore, Pakistan | +92 324 496 2952 | fazalkarim.dev@gmail.com | linkedin.com/in/fazalkarim | fazal26.github.io/portfolio

SUMMARY

Senior Full Stack Engineer with 7+ years designing, building, and scaling **TypeScript** applications for startups and Fortune 500 companies, with the last several years centered on **React** frontends for enterprise-grade platforms. Deep in React and TypeScript fundamentals — component architecture, React Context, async data layers with **TanStack Query**, and SSR / hydration with **Next.js**. Builds and maintains shared UI component libraries documented in **Storybook**, with solid testing habits across unit (**Vitest** / Jest + Testing Library) and E2E (**Playwright** / Cypress). Works AI-first with tools like Claude Code and Cursor as a daily part of delivery, and collaborates effectively across distributed, cross-time-zone teams. Strong focus on pragmatic trade-offs, performance, accessibility, and developer experience.

SKILLS

Languages & Core: TypeScript, JavaScript (ES6+), HTML5, CSS3

Frontend: React, Next.js, React Context, TanStack Query, Redux / Redux Toolkit, Vite, Storybook, Angular, Vue.js, React Native, Tailwind CSS, Material UI

Testing: Vitest, Playwright, Jest, React Testing Library, Cypress, Enzyme, Manual QA

Backend: Node.js, Express.js, PostgreSQL, REST APIs, Microservices, WebSockets / Socket.IO, GraphQL, Ruby on Rails, MongoDB, Redis, Firebase, Supabase

Data & Auth: Relational data modeling (PostgreSQL), JWT, OAuth 2.0, Role-Based Access Control

DevOps & Cloud: Docker, CI/CD, AWS, Git / GitHub, Bitbucket, Vercel, Heroku

AI Tooling: Claude Code, Cursor, GitHub Copilot — AI-assisted development as a daily workflow

EXPERIENCE

Senior Software Engineer (Freelance)
Jun 2022 – Present

Independent, Remote

- Own projects end-to-end with full architecture responsibility — from requirements and data modeling through deployment and scaling.
- Build full-stack TypeScript applications with React / Next.js frontends and Node.js / Express services backed by PostgreSQL.
- Design clean, normalized PostgreSQL data models from scratch and microservice-oriented backends secured with JWT / OAuth 2.0 and real-time WebSockets.
- Containerize and ship with Docker and CI/CD pipelines, managing production deployments and scaling.
- Use AI coding tools (Claude Code, Cursor) as a core, daily part of the workflow to accelerate delivery at production quality.
- Integrate new products with existing mature systems and third-party APIs — payments, maps, auth, and messaging.

Senior Software Engineer
Aug 2021 – May 2022

Nisum, Remote

- Built enterprise-grade applications in TypeScript with React, Angular, Node.js, and GraphQL.
- Delivered responsive, cross-browser interfaces to WCAG accessibility standards, improving overall usability.
- Rolled out CI/CD pipelines on GitHub and authored integration tests with Jest, partnering with globally distributed teams across time zones.
- Mentored junior developers and enforced clean-code practices through code reviews and pair programming.

Software Engineer to Senior Software Engineer
Jan 2019 – Aug 2021

Devsinc, Lahore

- Led development of cross-platform web and mobile apps using React, Angular, React Native, Node.js, and Ruby on Rails.
- Integrated third-party services — Stripe, Google Places, and Firebase — across web and mobile products.
- Engineered modular, reusable UI systems following DRY and SOLID principles to minimize refactoring.
- Turned proofs of concept into production systems and drove Agile ceremonies — sprint planning, retrospectives, backlog grooming, and QA coordination.

Software Engineer
May 2018 – Jan 2019

Codexia Technologies, Lahore

- Built hybrid mobile apps with Ionic and Angular, delivering consistent UX across Android and iOS.
- Shipped Firebase-powered authentication and real-time features for products including QuitFix, Kodeec, and Cambuz.
- Performed manual QA across platforms, reducing production defects.

Front End Developer
Sep 2017 – Jan 2018

Narsun Studios, Lahore

- Engineered UI for large-scale live stadium experiences (Xcite Interactive) using Angular, Firebase, and PubNub.
- Enabled real-time user engagement through seamless frontend–backend synchronization with Express.js.

Lecturer, Computer Science
Aug 2015 – Jan 2017

Old Alpha Academy, Lahore

- Taught foundational computer science to high-school students, strengthening communication and instructional skills.

PROJECTS

- **Roxova** — Enterprise media-licensing platform with built-in legal & compliance handling for owned and third-party content, plus a pre-licensed content library. *(Next.js, React, Node.js)*
- **Prologis** — Real-estate management platform for sale, rental, and lease operations with logistics, measurements, and legal-compliance modules, built with an accessibility-first UI. *(React, Node.js, GraphQL)*
- **Go Boon** — Referral and candidate-matching platform integrating job postings aggregated from multiple external systems and APIs into personal and corporate profiles. *(Angular, React, React Native, Ruby on Rails)*
- **AnaNinja** — Enterprise retail-management platform covering inventory, warehousing, delivery, payments, returns, and wishlists. *(Vue.js, React Admin, Google Maps, Material UI)*
- **Run Buddy** — Pet-fitness app with trainer scheduling, activity tracking, pet profiles, chat, and Stripe payments. *(React Native, Ruby on Rails, Stripe)*
- **Kodeec** — Hybrid real-estate listing app for Gulf markets with buyer–agent contact and request-based notifications. *(Ionic, Angular, Firebase Realtime DB)*

EDUCATION

BS, Software Engineering
2013 – 2018

University of the Punjab (PUCIT)
